

Aksha Surveillance System and Digital Twin Project

Advanced AI Solutions for Manufacturing Excellence

Introduction to Aksha

- ▶ Aksha is an intelligent surveillance system designed for automated monitoring with minimal human intervention.
- ▶ Utilizes advanced technologies such as Computer Vision, Artificial Intelligence, and Gen AI.
- ▶ Focuses on real-time object detection and anomaly identification to enhance safety and security.

Core Features of Aksha

- ▶ 24/7 monitoring capabilities with live recording and data processing.
- ▶ Advanced object detection for various entities including vehicles, people, and unusual behaviors.
- ▶ Customizable alert systems that allow users to set specific notifications based on detected anomalies.

Business Value Proposition

- ▶ Transforms traditional CCTV setups into smart surveillance systems, enhancing operational efficiency.
- ▶ Reduces human monitoring efforts, allowing businesses to allocate resources more effectively.
- ▶ Low capital expenditure (CapEx) with SaaS-based pricing models, making it accessible for various industries.

Applications in Industrial Settings

Similar projects using image/video analytics:

- **Absenteeism Prediction** for workforce for a top global **automobile company**
- **Manufacturing process monitoring** for a large company in Ahmedabad, India

- ▶ Customized solutions for worker safety monitoring in construction and industrial environments.
- ▶ Real-time insights into worker activities and safety compliance through advanced video analytics.
- ▶ Seamless integration with existing infrastructure, ensuring minimal disruption during implementation.

Case Study: Worker Safety

- ▶ Development of a video analytics solution specifically for monitoring worker safety at construction sites.
- ▶ Utilized Aksha's capabilities to address challenges in real-time monitoring and anomaly detection.
- ▶ Phased implementation approach tailored to client needs, enhancing adaptability and effectiveness.

Collaborative Development Efforts

- ▶ Collaboration with NDIL to customize Aksha for enhanced worker safety features.
- ▶ Successful integration of Gen AI to improve detection accuracy and reporting capabilities.
- ▶ Phased development approach with continuous support to optimize performance on edge devices.

Customer Testimonials

AlgoAnalytics - An Overview

AlgoAnalytics, an NTT Data invested company, specializes in AI/ML-powered solutions with over 100+ implementations across various domains. Their expertise includes:

- Classical Machine Learning and Deep Learning
- Emerging technologies like Quantum Computing and Digital Twin
- LLM-based chatbot development
- Predictive, Image/Video, and Text Analytics
- MLOps, DevOps, FinOps, and SecOps

They are known for their proven experience in Generative AI (Gen AI) solutions, offering a comprehensive tech stack and portal for managing resources and assets from 20+ Gen AI projects.

- Positive feedback highlighting the reduction in human monitoring efforts and improved anomaly detection.
- Clients appreciate the flexibility and customization options that Aksha provides.
- Recognition of Aksha's role in transforming traditional surveillance into proactive safety management.

Future Innovations and Updates

AlgoAnalytics - Offerings and Gen AI Expertise

Core Offerings	Gen AI Expertise
Generative AI solutions - Business applications using Large Language Model (LLM) frameworks - LLM based Chatbot development	Proven expertise in designing and deploying Gen AI based solutions for various types of use-cases, leading to deep expertise in complete Gen AI tech stack. 20+ Gen AI Projects/ POC experience 25+ Gen AI skilled Resources Gen AI assets portal: apps.onestop.ai/llm-dash-board/#home
AI/ML Solutions - Predictive Analytics - Image/Video Analytics - Text Analytics	Apps / User Experience (Front End) Streamlit django React
Cloud Data Engineering - MLOps - Monitor and Maintain AI models - DevOps - Automate key tasks - FinOps - Optimize cloud expenses - SecOps - Security and Compliance	Orchestration & Integration Frameworks LangChain LlamaIndex
Emerging Technologies - Digital Twin - Quantum Computing	Vector Database Pinecone Amazon Elasticsearch Chroma
	LLM monitoring / observability tools LangSmith Traceloop
	LLMs OpenAI GPT Meta LLaMA OpenAI Mistral
	Data extraction tools UNSTRUCTURED Library Azure OpenAI Intelligence HuggingFace
	Cloud Infrastructure Azure AWS

AlgoAnalytics Pvt. Ltd. | Strictly Confidential | 5

- ▶ Ongoing enhancements to Aksha's features, including further integration of Gen AI capabilities.
- ▶ Plans for expanding applications across various sectors beyond construction and industrial domains.
- ▶ Commitment to continuous improvement based on client feedback and technological advancements.

Conclusion and Call to Action

- ▶ Aksha represents a significant advancement in surveillance technology, prioritizing safety and efficiency.
- ▶ Encouragement for stakeholders to explore Aksha's capabilities for their specific business needs.
- ▶ Invitation for further discussions on implementation strategies and potential collaborations.
